A Model To Improve Rythu Bharosa Kendram Performance.

By Team: CodeRelay

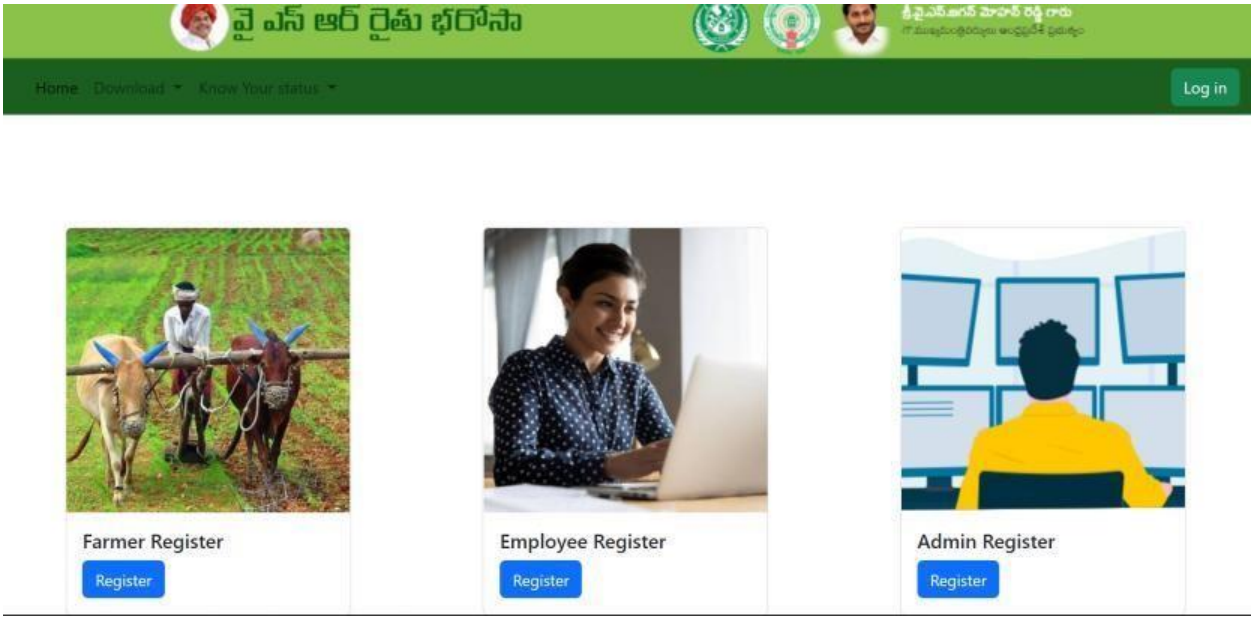
A web application that helps in improving Rythu Bharosa Kendram Performance by Team CodeRelay is build using Bootstrap 5

- Search the below link in the browser to see the documentation of our project
- github repository link: https://github.com/striver11/Rythu_bharosa_kendram

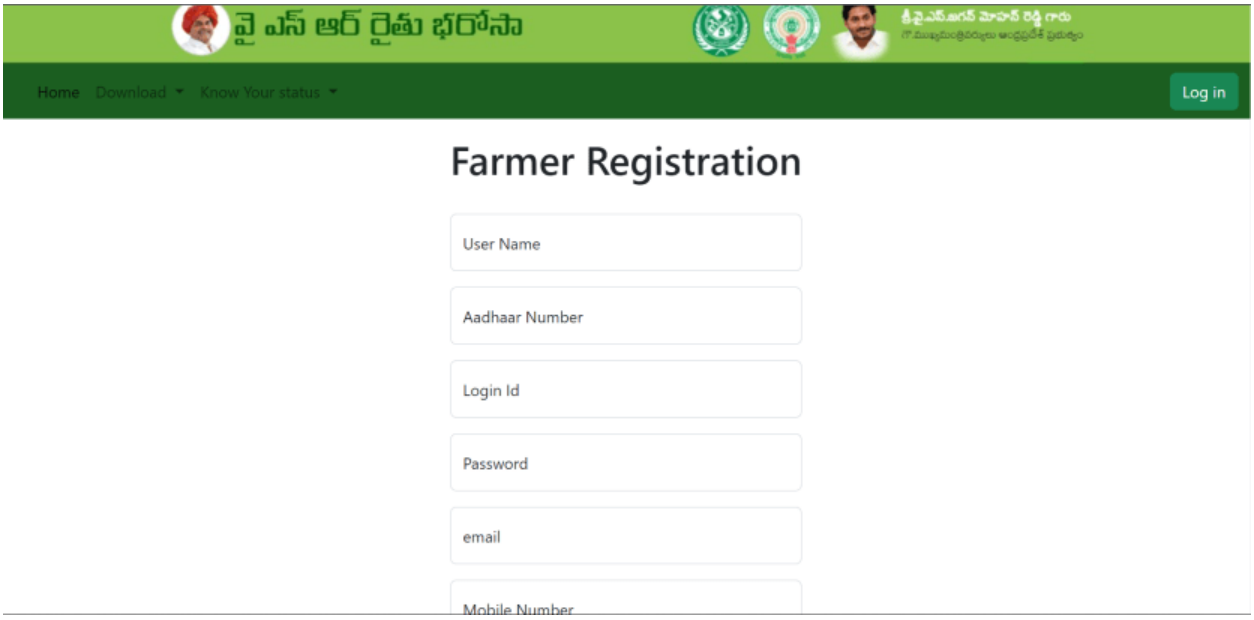
LOGIN/REGISTER

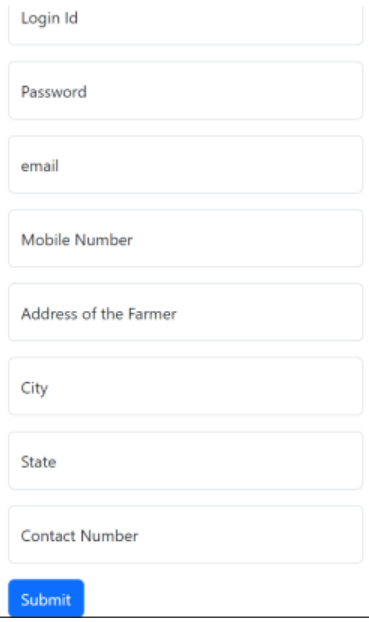
The above is the website for Rythu Barosa Kendram. In this website you will get two options like login and register. Login is for already registered employees or for farmers and also for admins. If the new register has to be done then click on register you will get three options based on your category like farmer, employee and admin. Click on that particular category so that you can register for that category.

If you click on the register button the following page will appear.



From the above page based on your category click on to that button. If you are a farmer then if you click on the register button then you will be redirected to another page as shown in the below picture.



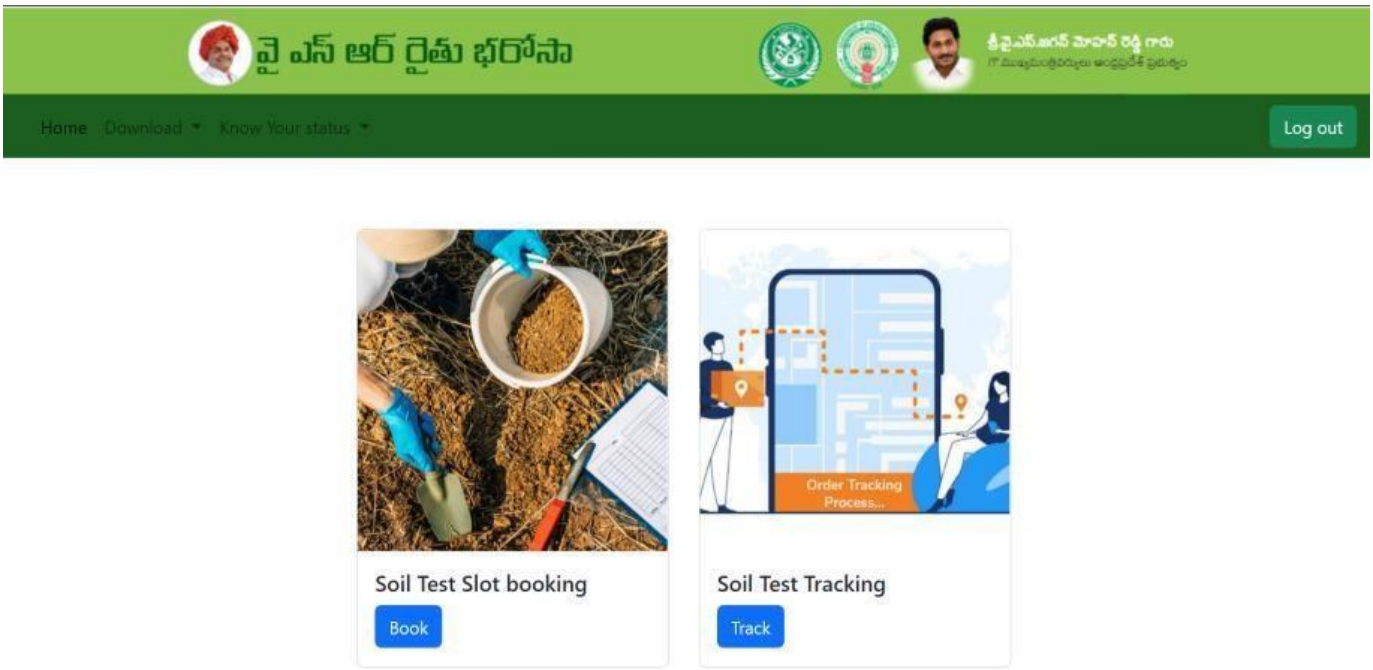


The above is the page you will get when you click on the farmer's register page and then fill in the details given below like your name, aadhar number, login id, password, email, mobile number, address of the farmer, city, state, contact number. After filling all these details you have to click the submit button you will get registered to the farmer's page then if you click on the login button on the right corner of the page.

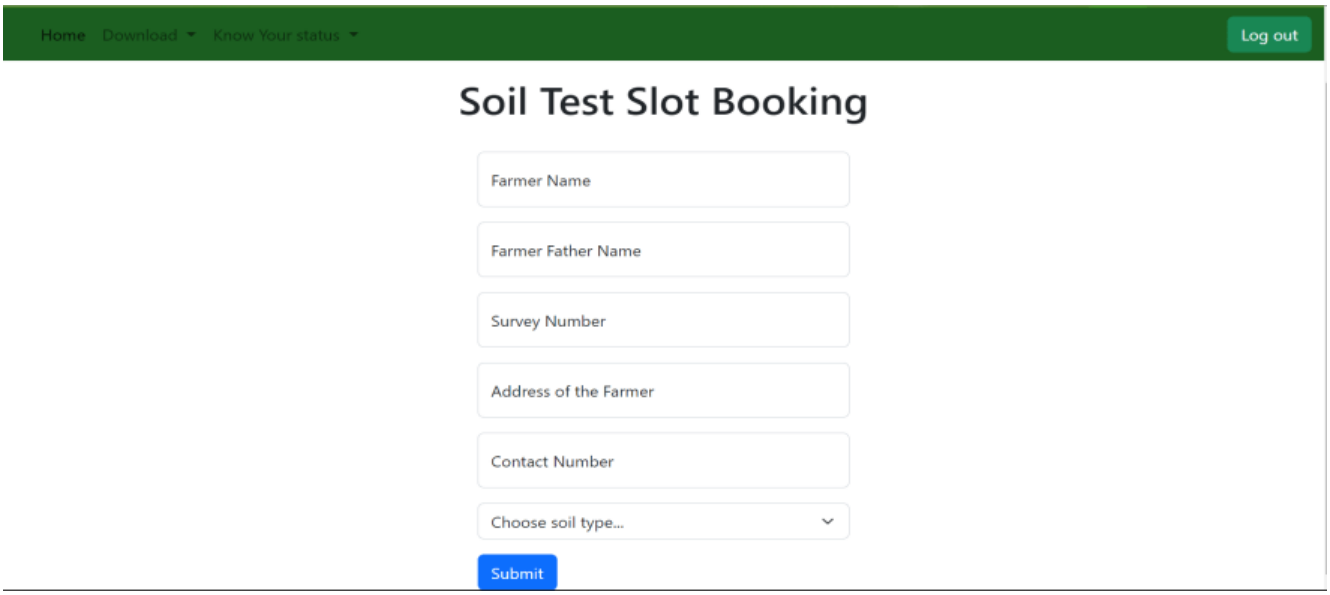
After registration is done you will know your login details by filling the login details click on the login button

You will get the above page by filling the above details like farmer name, farmer aadhar number and password then do login you will get the page given below

This is the page you will get when you click on the login page then you will get every detail in this page like the above page. It contains every details like soil test, seed test, fertilizers ordering, seeds ordering, feedback, agriculture advisory.

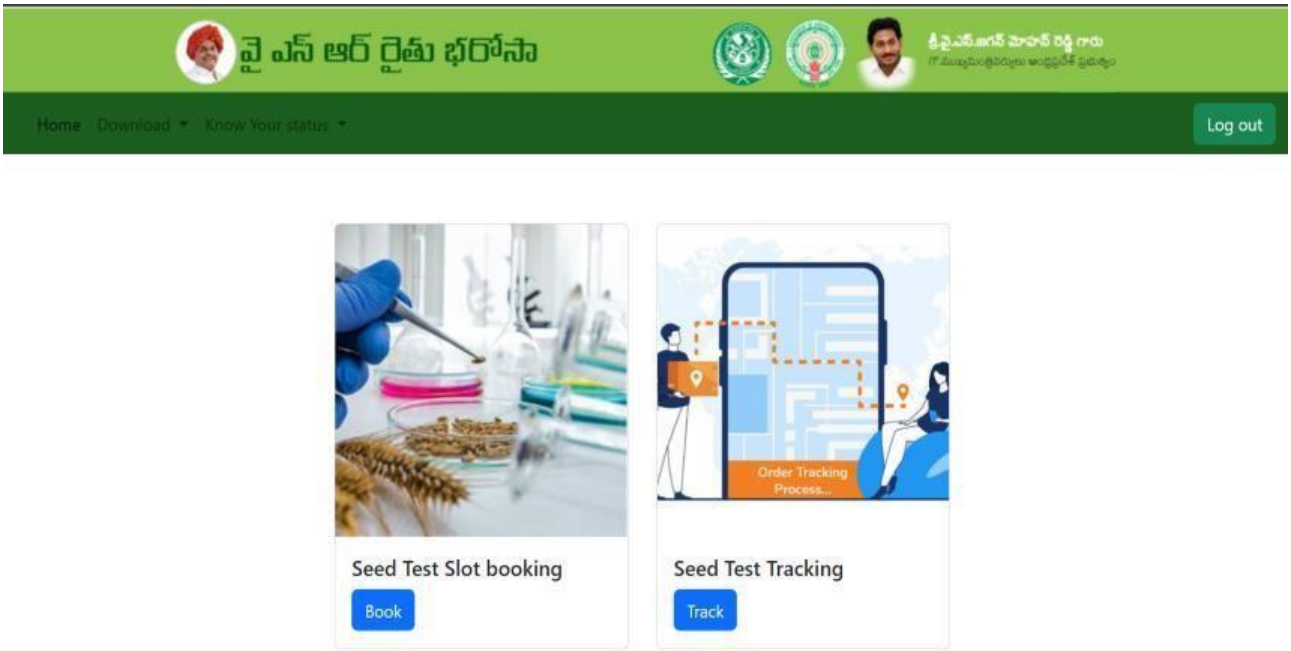


When you click on soil test you will get two blocks like soil test slot booking and soil test tracking



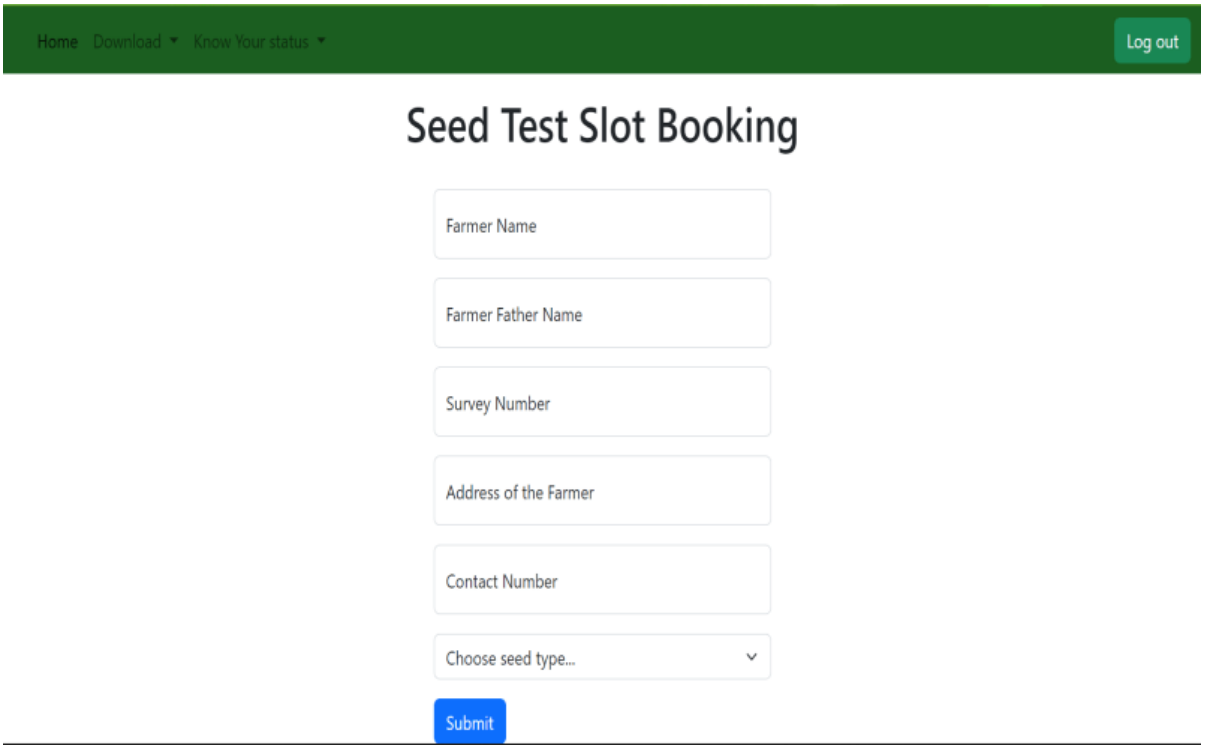
After clicking on soil test slot booking you will get details like name, father name, survey number, soil type, address of the farmer, contact number. After clicking on soil test tracking you will get a page like tracking of soil test and every detailed information like the time you have requested for soil test and also about the stage of your soil test going to happen.

After clicking on soil test tracking you will get a page like tracking of soil test and every detailed information like the time you have requested for soil test and also about the stage of your soil test going to happen.



If you go back and click on the seed test then you see two blocks like seed test slot booking and seed test tracking. If you want to test the seed then by

clicking on to the seed test slot booking then you can book for testing the seeds.
The below page is to book slots for seed tests. You have to enter details like farmer name, farmer father name, survey number, address of the farmer, contact number, and there you have to choose the type of seed you want like groundnuts, sunflower, paddy, wheat etc. After filling details if you click on the submit button you will booking is successful.



When you go back and see you will get two blocks after booking the slot you can see the tracking of that booking like when did you book the slot for testing, when it is going to be tested, like these details you will get to after clicking on to the seed test tracking.
The below page is seed test tracking

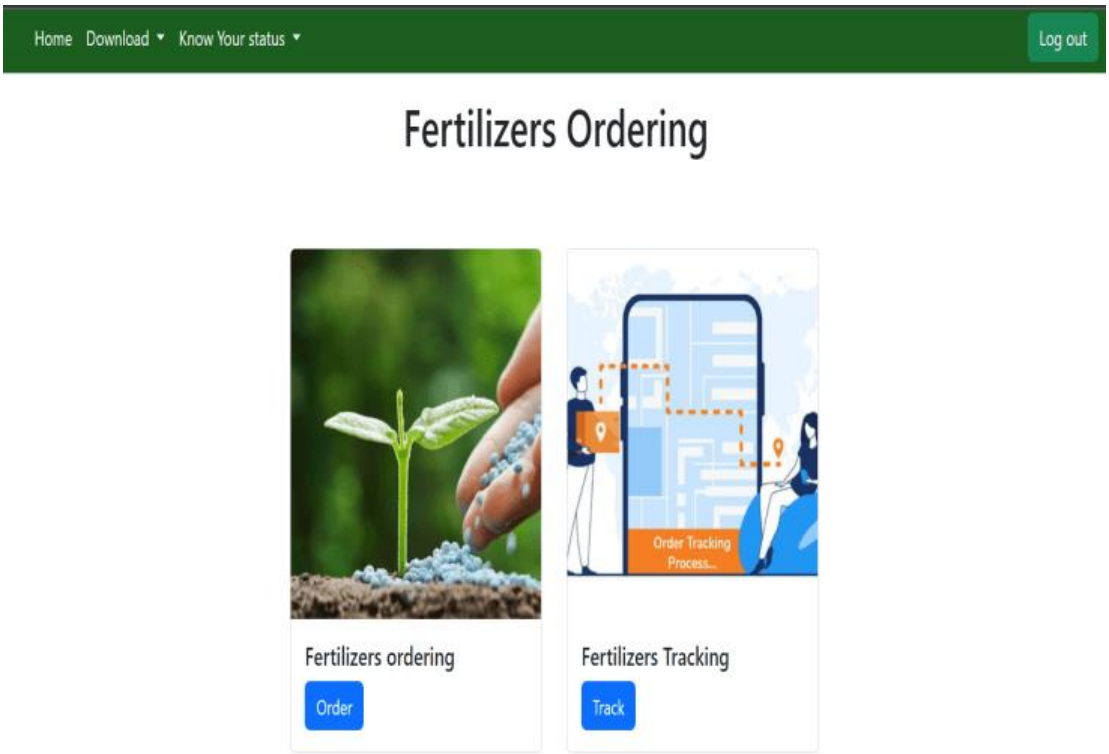
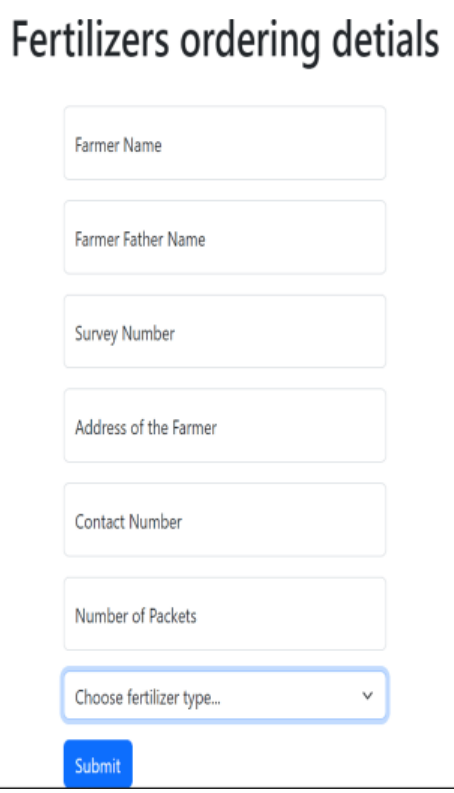
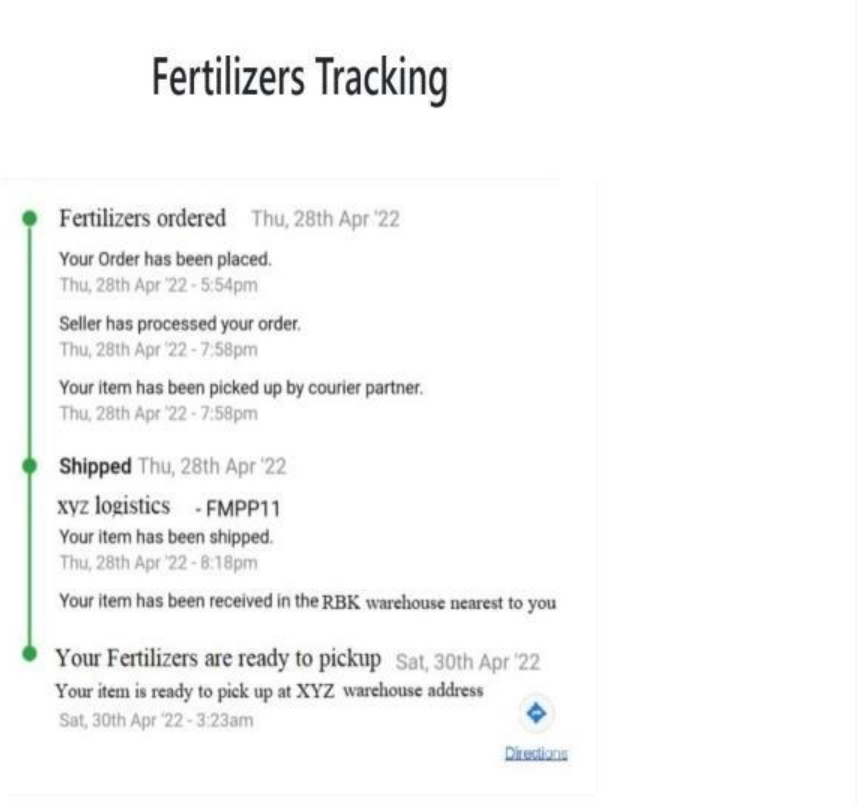
If you want to order the fertilizers go back and click on fertilizers ordering then you will get the page below showing two blocks like fertilizers ordering and fertilizers tracking.



For ordering fertilizers click on the fertilizers ordering then you will go to page so that you have to fill the details like Farmer name, Farmer father name, Survey number, Address of the farmer, Contact number, Number of packets, and then you have to choose type of fertilizers you want like urea, diammonium phosphate, potassium chloride, rock phosphate etc.

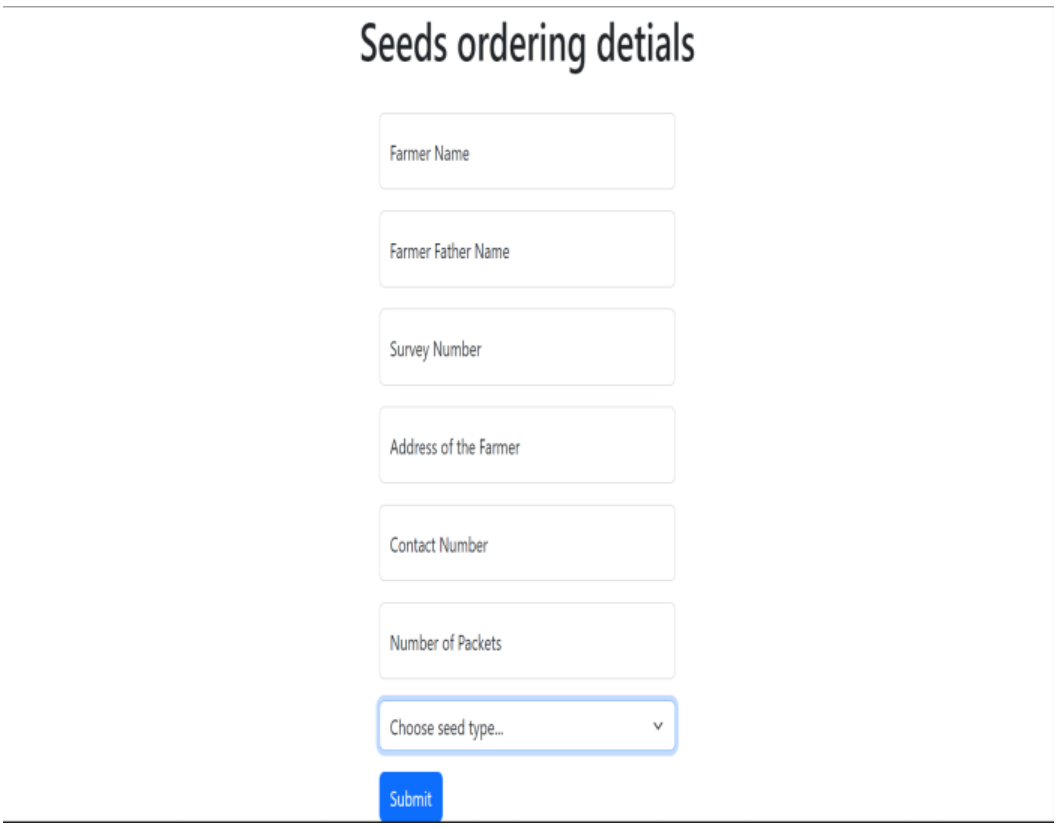


After ordering is done then you can see the tracking of your order i.e., time of order, packing, shipping etc. these are the things you will see in the fertilizers tracking page.



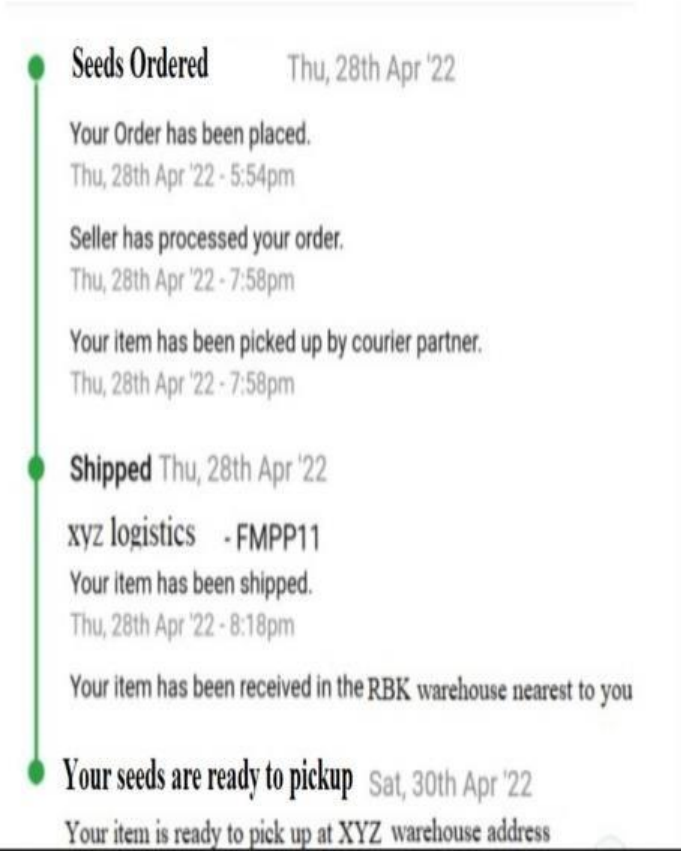
If you want to order seeds click on the seeds ordering you will see two blocks like seed ordering and seed tracking just like the picture given below.

To order seeds click on seeds ordering and you will see a page asking to fill in the details like Farmer name, Farmer father name, Survey number, Address of the farmer, Contact number, Number of packets, and choose the type of seeds like groundnuts, sunflower, paddy, wheat etc.

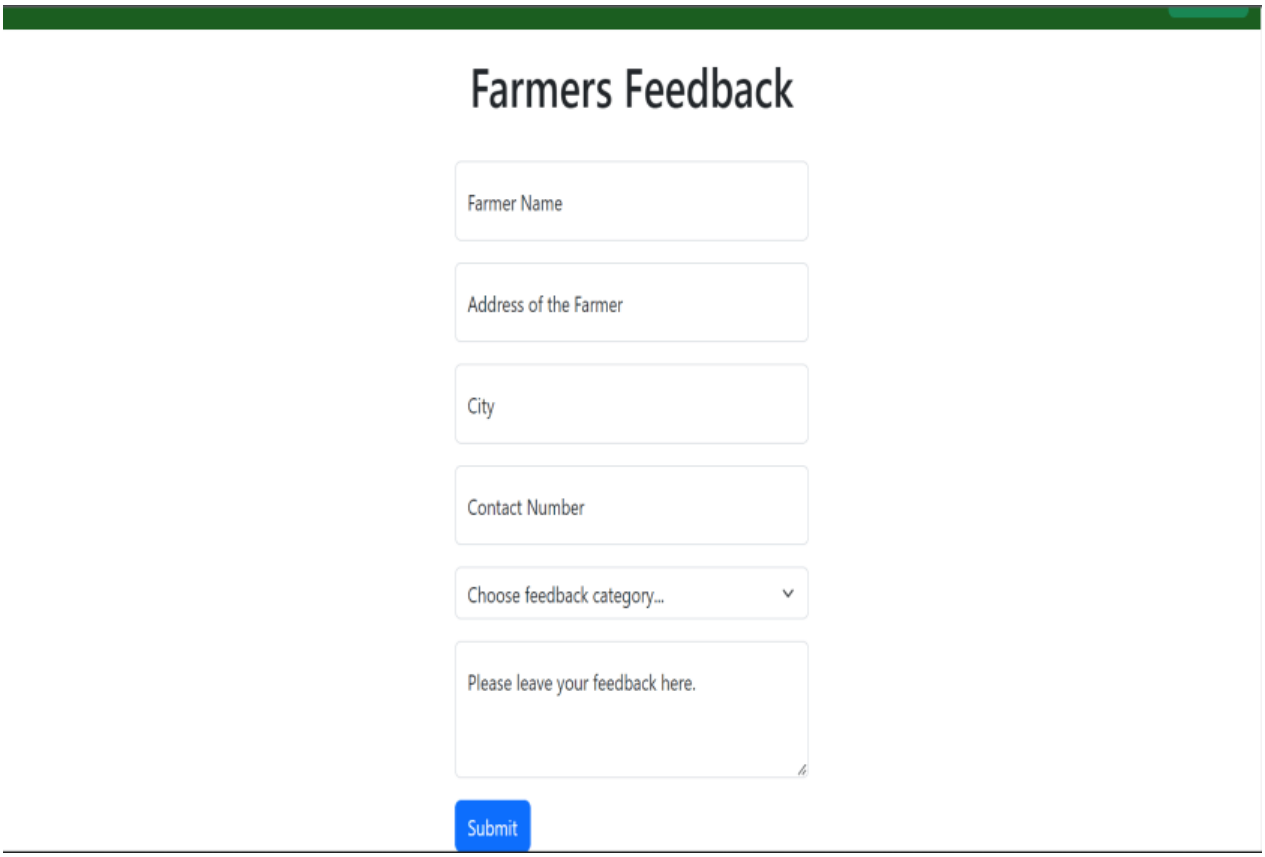


To know the status of your order click on seeds tracking and you will know every detailed information about your order status like packing, shipping address etc. You can see the tracking page is the same as below page.

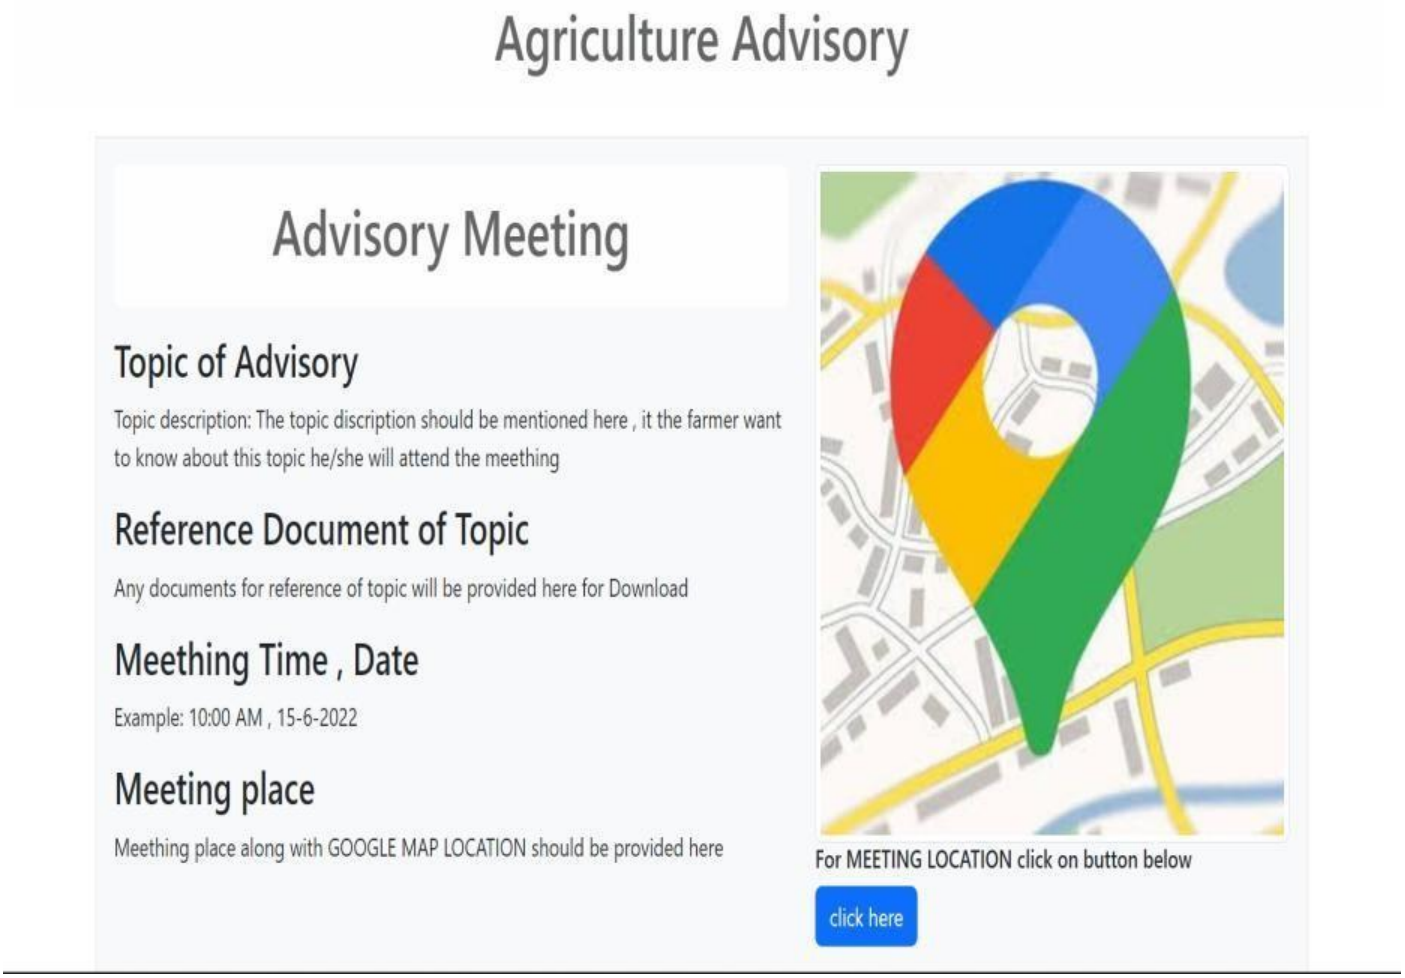
Seeds Tracking



In the website you can see a feedback button so that you can give feedback about anything like suggestions, complaints, something about the site, compliments etc.
The below page shows about feedback page

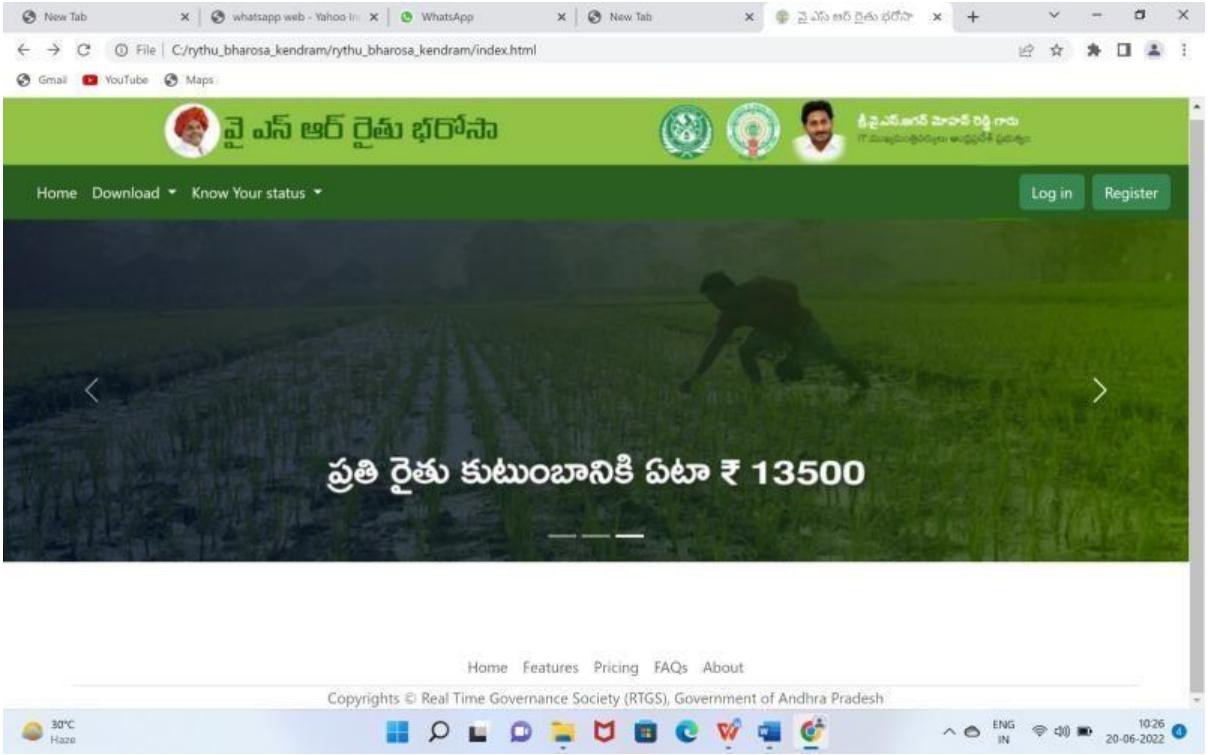


If you want any agriculture advisory you can click on the agriculture advisory button and that page shows you the below picture.



EMPLOYEE LOGIN PAGE

Employee login is a login for employees who work for RBK's. The employees have the access to update the data, modify the data and certain control access up to the given limit by administration The employee page have the access to assist the farmers for their requirements and help them to their request.



In home page , we will have an employee login page in home page by clicking it we will have a login for employees where employees login with there name ,login id and password .

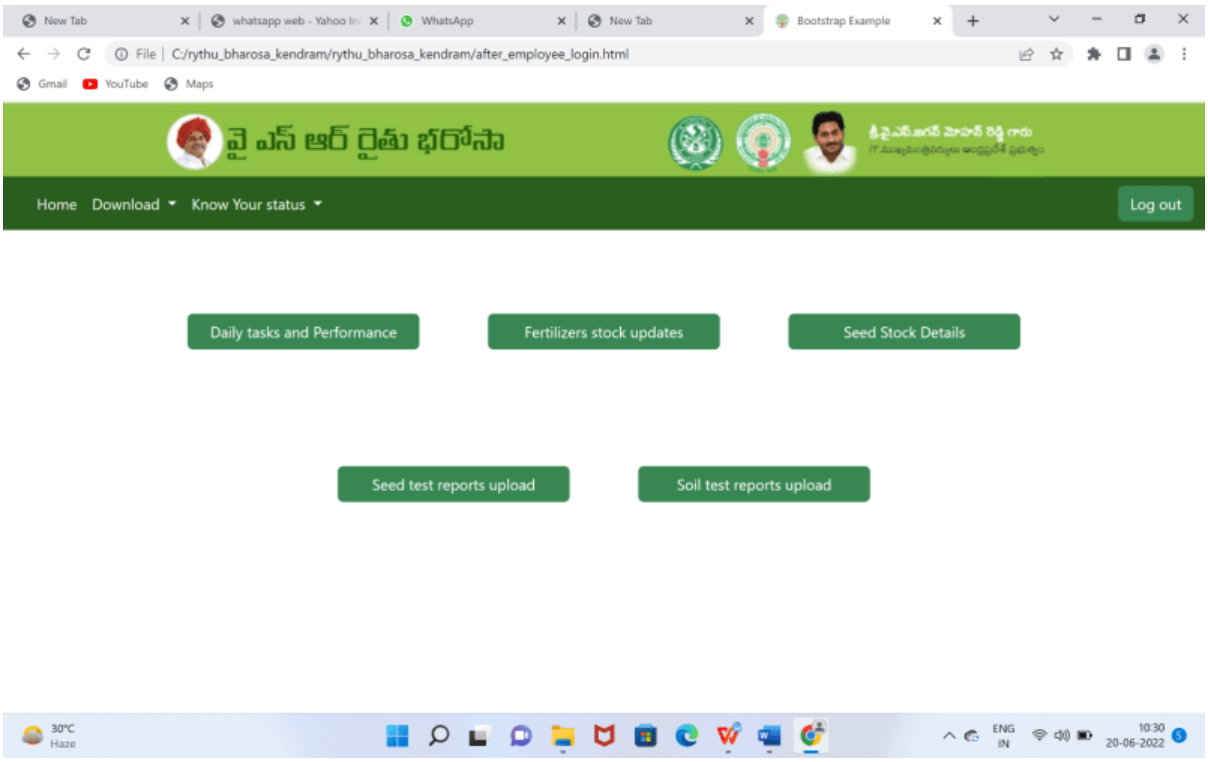
After verification of details it will take to the next page where employees can perform their tasks. In employees page, the employees will handle tasks like;

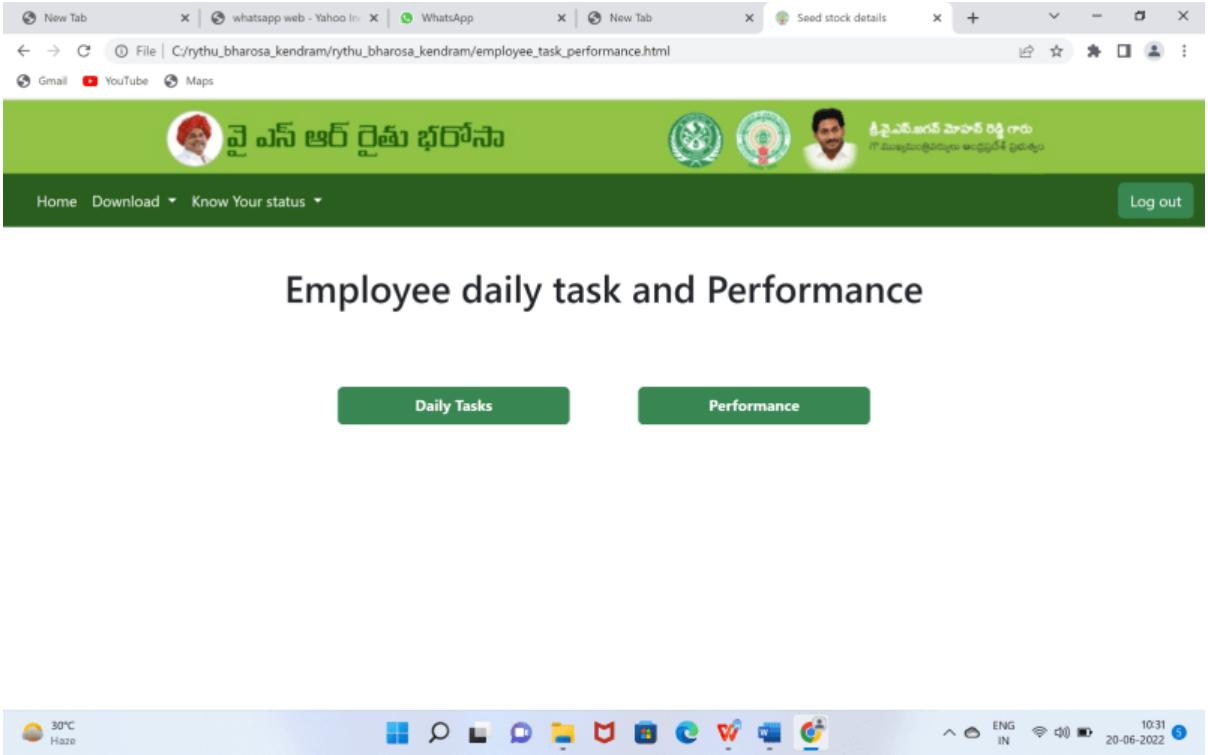
- Daily tasks and performance
- Fertilizers stock distribution and updates
- Seed stock details
- Seed test reports upload
- Soil test reports



DAILY TASKS AND PERFORMANCE:

In this, there will be daily tasks and performance sections where daily tasks contain the tasks that are meant to perform regularly and that have tasks sections that need to be completed in the given timeline. The tasks that are performed by the employees well be observed and rated accordingly the tasks performed by them and daily tasks are the

tasks that are performed as per instructions and that performance will be rated according to the performance performed by the employees.



PERFORMANCE TRACKING OF EMPLOYEE:

As we know employees of the RBK's are the people who serve the farmers welfare purpose. Based on the daily tasks performed by the Employee, The Employee performance is produced for every month and it is represented in this page as their progress bar.

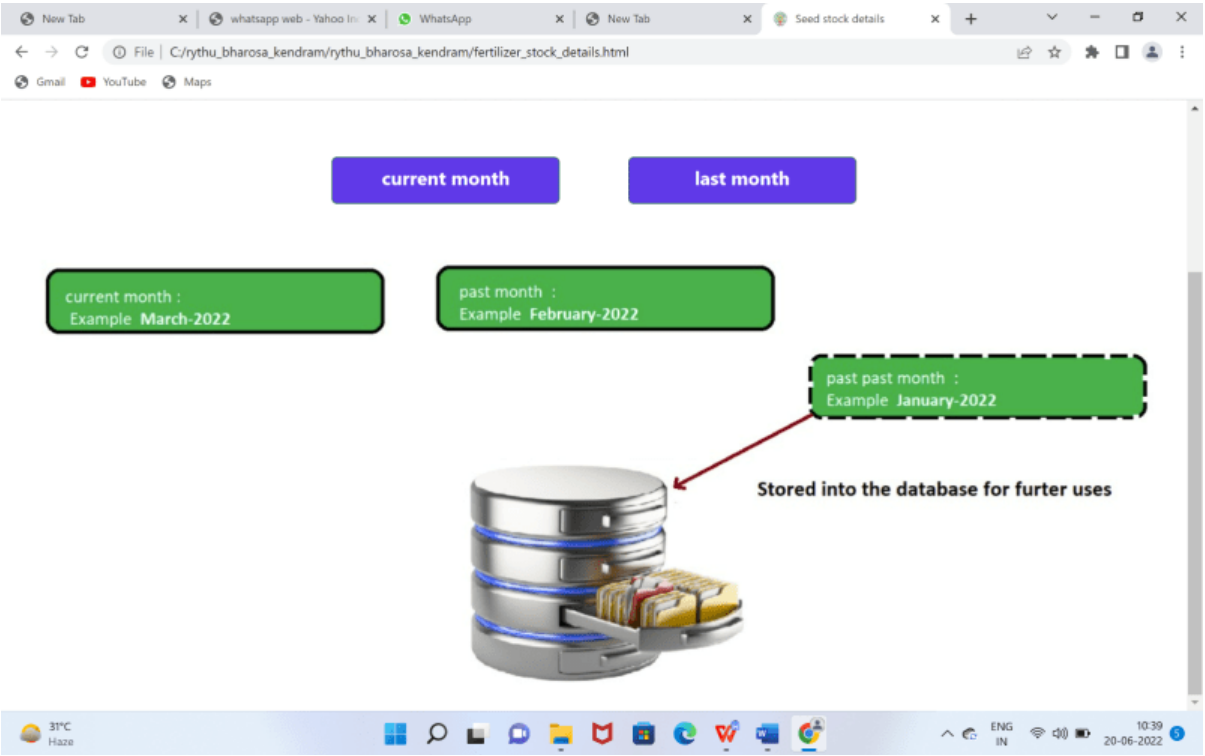
FERTILIZER STOCK DISTRIBUTION AND STOCK UPDATE:

All the information of the details will be stored in a database as follows;

- Firstly, the current month's data will be stored in the excel sheet that was linked for the CURRENT MONTH.
- Secondly, the past month's excel data will be stored and processed , and it's linked to LAST MONTH.
- Lastly, every previous month's data will be stored in database.



SEED STOCK DETAILS:

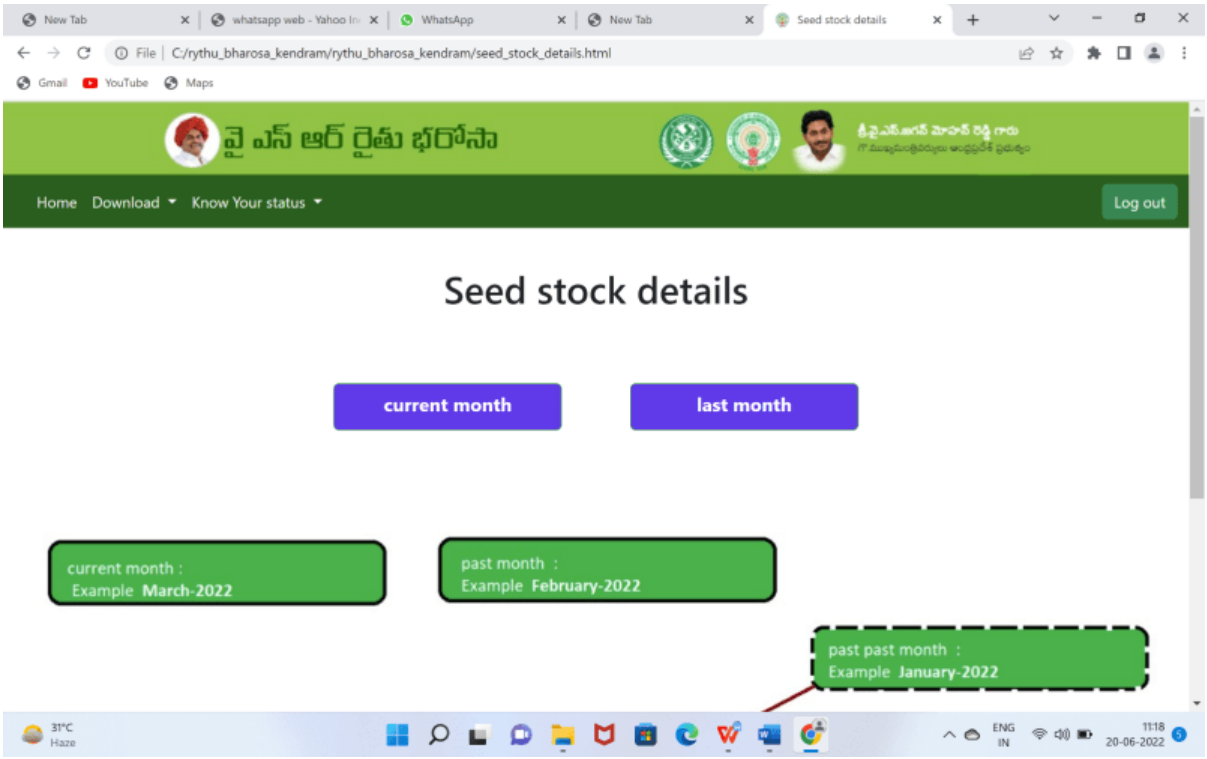
As seeds are very important for farming, quality of seeds need to be noted importantly because seeds are the main source of cultivation of crops. So, RBK's provides certified ISO seeds to farmers for well growth crops that helps farmers to gain profit. That's why seed stocking is an important part of plantation and seed stocking is also

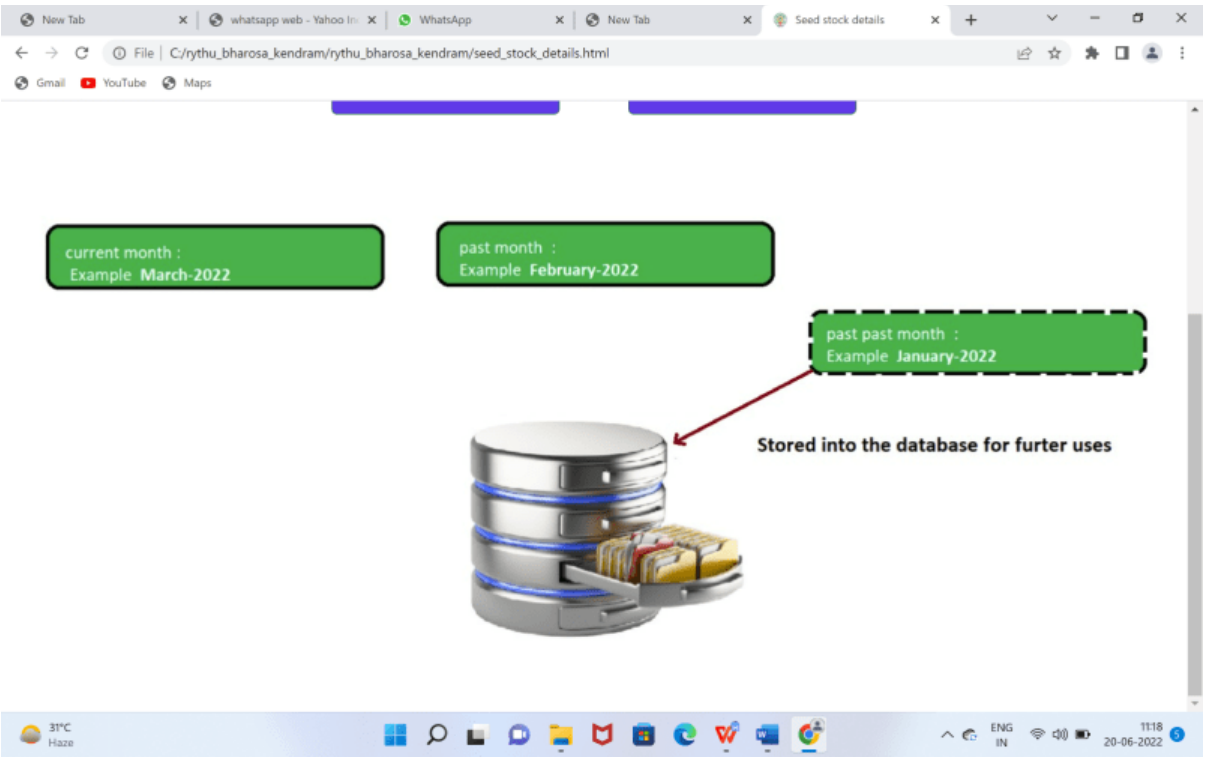
an important part of backing for which it helps in emergency situations.

All the information of the details will be stored in a database as follows;

- Firstly, the current month's data will be stored in the excel sheet that was linked for the CURRENT MONTH.
- Secondly, the past month's excel data will be stored and processed and it's linked to LAST MONTH.
- Lastly, every previous month's data will be stored in the database.

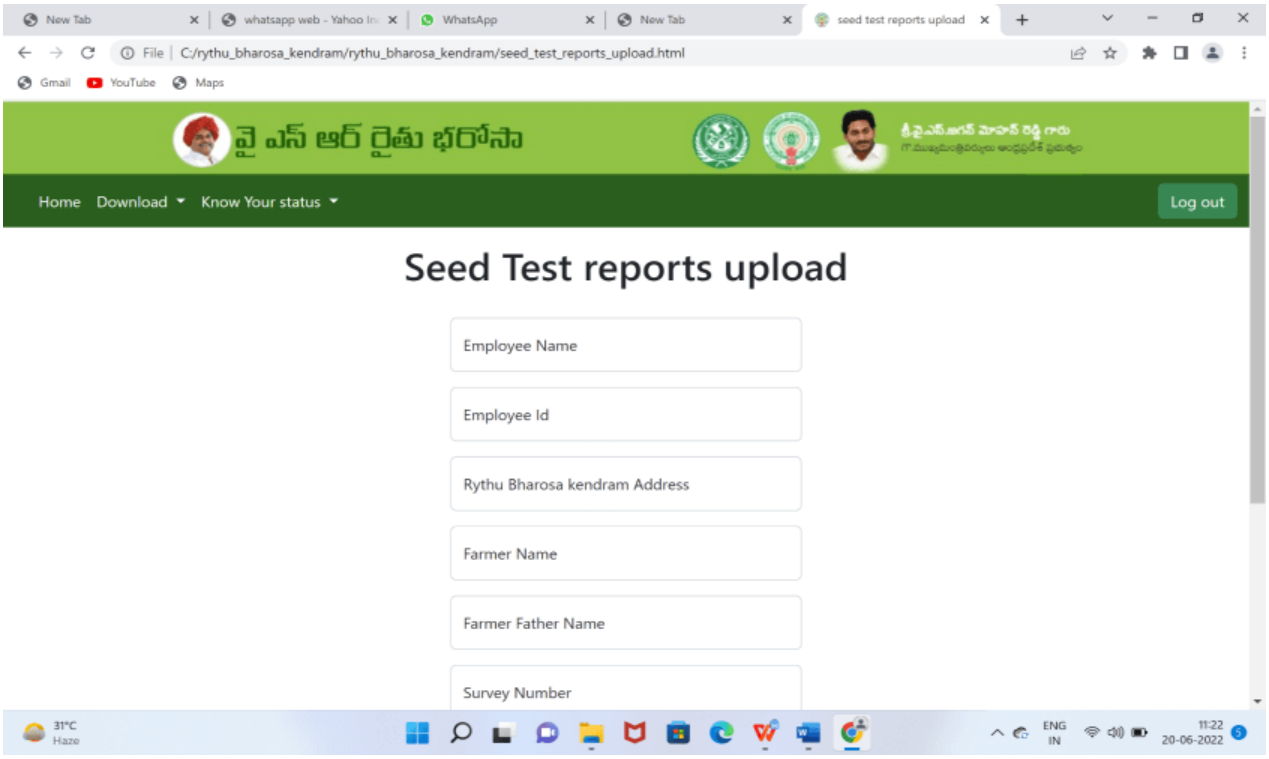
By storing the seeds stocking, we will have the incoming and outgoing of seeds that have been distributed. It's important because seed stock databases help in tracking of seeds that are distributed to the farmers. It also helps in knowing the information of seeds that reach the RBK center.

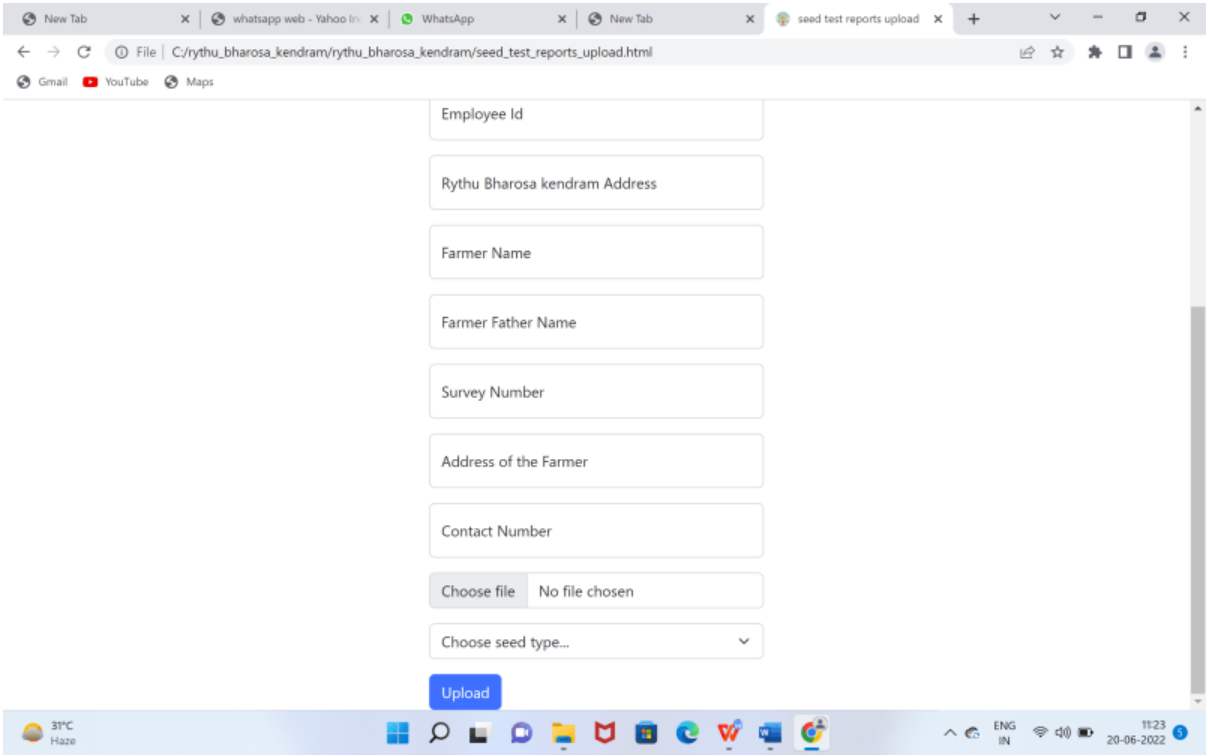




SEED TEST REPORT UPLOAD:

Seeds which are meant to be tested are the seeds that need to be clarified to sow, for which crop to produce good goods for profits. Here the Employee will get a copy of every farmer seed test report from the seed test center and the employee will upload this report to the database by filling the following form shown below after clicking on the upload the details will be stored to the database.





The database of the Soil Test Reports will have the following constraints and it should look similar to this

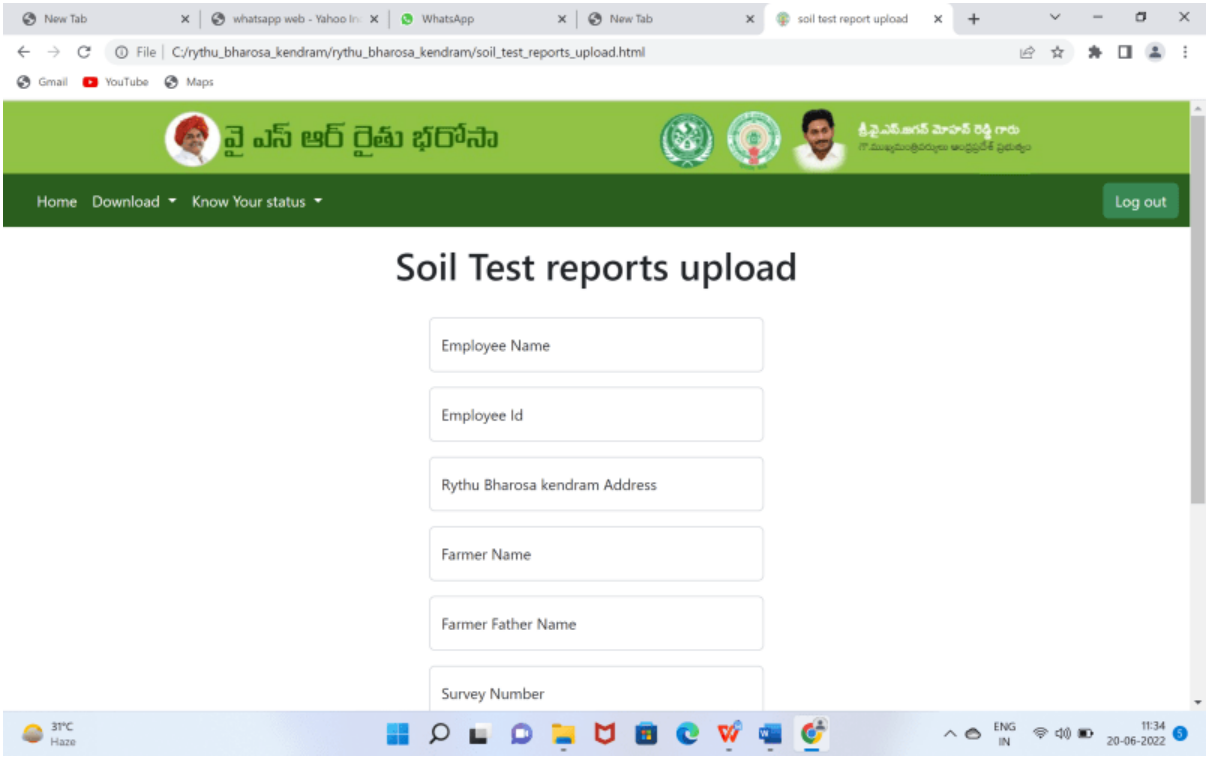
Seed Test reports upload

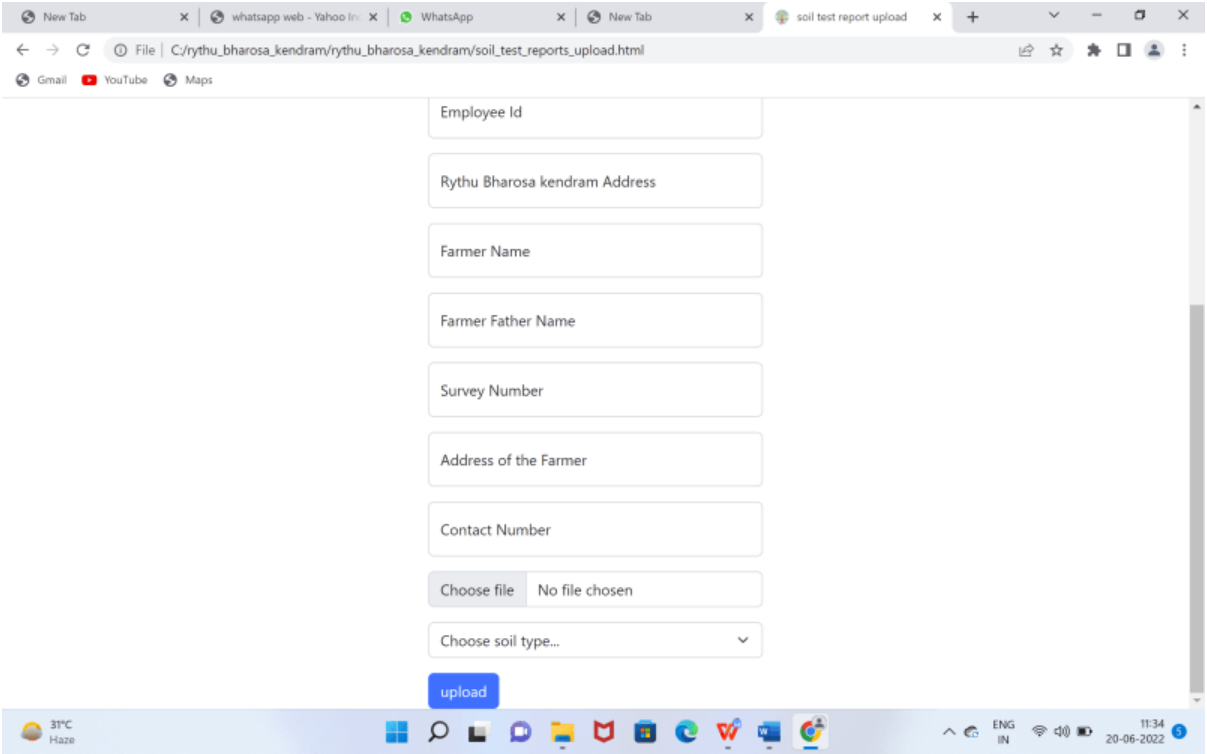
> database should like this

Sno	Date	RBK ADDRESS	FARMER NAME	SURVEY NUMBER	EMPLOYEE NAME	EMPLOYEE ID	PDF REPORT(uploadloaded)
1	12-5-7-2022	13-2,rbk. ananthapur	rahul	456	ravi	46465456	uploaded pdf

SOIL TEST REPORTS:

The soil which is tested is to check the capacity of soil conditions that helps for cultivation of the right crops for that soil. Here the Employee will get a copy of every farmer soil test report from the soil test center and the employee will upload this report to the database by Filling the following form shown below, after clicking on the upload the details will stored to the database





The database of the Soil Test Reports will have the following constraints and it should look similar to this

Soil Test reports upload

> database should like this

Sno	Date	RBK ADDRESS	FARMER NAME	SURVEY NUMBER	EMPLOYEE NAME	EMPLOYEE ID	PDF REPORT(uploadloaded)
1	12-5-7-2022	13-2,rbk. ananthapur	rahul	456	ravi	46465456	uploaded pdf
